

## Handwriting Font Applied to Text and Math

This is a demonstration of the Augie handwriting font applied to both text and math.

Here is Einstein's famous equation:

$$E = mc^2$$

A definite integral example:

$$\int_a^B x^2 dx = \frac{B^3}{3} - \frac{a^3}{3}$$

Here is the quadratic formula:

$$x = \frac{-B \pm \sqrt{B^2 - 4ac}}{2a}$$

Note: Handwriting style has been applied to all characters, digits, and symbols.
